

Are you complying with site safety?

Regular safety inspections are mandatory for work equipment. Let our experienced service engineers undertake this inspection, saving you money and time.

only **£120.00**
(including certificate)*

Is your lifting equipment up to the mark?

If you own or operate lifting equipment (such as an excavator used for lifting or a telehandler) you have a legal obligation to ensure that it holds a valid Report of Thorough Examination. CBL can supply copies of certificates for our hire fleet machines and we are now accredited to carry out the relevant inspection on your own equipment to ensure you don't fall foul of the law.

We abide by a code of practice administered by CFTS (Consolidated Fork Truck Services) and formulated by the FLTA (Fork Lift Truck Association) and BITA (British Industrial Truck Association), working in synergy with HSE (Health and Safety Executive). This means you receive clear and comprehensive documentation, underpinned by uniformly high quality standards, that comply with both LOLER 98 and PUWER 98 legislation.

... Let CBL help you keep your equipment safe & legal ...
